PRACTICAL SAFETY

IPAF / MEWP Operator Training

Operate mobile elevating work platforms safely with category-specific IPAF training.

Overview

This IPAF course combines theory, practical instruction and assessment for the relevant MEWP category. Participants learn to inspect, position and operate the equipment safely. The course is matched to the lift type and intended task. Successful participants receive a digital IPAF PAL Card as recognised evidence of operator competence.

What participants learn

- Recognise hazards and plan MEWP use
- Complete pre-use inspections and checks
- Position and operate the equipment safely
- Respond to faults and emergency situations

Organisational value

- Documented competence for the relevant category
- Consistent inspections and operating practices
- Safer positioning and control of MEWPs
- Five-year digital IPAF PAL Card after successful completion
